

FCC Commissioners
The Federal Communications Commission RE: Docket 04-435
445 12th Street, SW
Washington, DC 20554

Dear FCC Commissioners ,

Most people, unlike those in government who make decisions do not fly first nor business class. Decision makers should be forced to live the consequences of their decisions. That is a pipedream considering that e.g. George Bush Jr. and those in his administration constantly lie and are corrupt to their cores and the corruptness of the current majority in Congress. My profession requires that I fly at least every other week. I am writing to voice strong disapproval regarding the FCC even considering a proposal to relax the restrictions on the use of cell phones on airplanes in flight.

There are no objective data to state that that cell phone use does not interfere with navigational instruments. Because of the airlines' irresponsible cramping of passengers, allowing too much carry on baggage, the thin air in airline cabins and cheap labor conservative employment "values" there is already much "plane-rage" occurring. Common sense would indicate cell phone usage would increase the tension. Adding more tension by the introduction of cell phone use in the cabin IMO would hinder flight attendants' ability to maintain order in any emergency. Moreover, cell phone use could also enable terrorists to coordinate plans with those on the ground more effectively.

Please leave the current rules at least in effect and if you want to change the rules then please ban ALL cell phone usage on airplanes -- that would be a step in the right direction.

Sincerely,

c currey
